ACTA MECHANICA

Vol. 91, 1992

Contents

Contributed Papers

Bergander, H., Kreißig, R., Gerlach, J., Knauer, U.: Standard formulation of elastic-plastic deformation laws . . . . . 157—178

Bielski, W. R., Matysiak, S. J.: Surface waves in a periodic two-layered elastic half-space . . . . . 47—55

Bradford, I. D. R., England, A. H., Rogers, T. G.: Finite deformations of a fibre-reinforced cantilever: Point-force solutions . . . . . 77—95

Cederbaum, G.: On the parametric instability of laminated plates modeled within a high-order shear-deformation theory . . . . . 179—191

Goldstein, R. V., Lewandowski, J.: Surface roughness induced attenuation and changes in the propagation velocity of long Rayleigh-type waves . . . . . 235—243

Heuer, R.: Static and dynamic analysis of transversely isotropic, moderately thick sandwich beams by analogy . . . . . 1—9

Hill, D. L., Hill, J. M.: Utilization of nonlinear diffusion solutions for *n*-diffusion and power-law materials . . . . . 193—208

Ingham, D. B., Yan, B.: Fluid flow induced by a small amplitude harmonically oscillating cascade . . . . . 27—46

Nakagawa, T.: Effects of a small airfoil-shaped splitter plate on vortex shedding from a square prism at subsonic Mach numbers . . . . . 11—25

Rajagopal, K. R., Wineman, A. S.: Flow of electro-rheological materials . . . . . 57—75

Sander, J., Hutter, K.: Evolution of weakly non-linear shallow water waves generated by a moving boundary . . . . . 119—155

Vadasz, P., Braester, C.: The effect of imperfectly insulated sidewalls on natural convection in porous media . . . . . 215—233

Wang, W., Wang, M. Z.: Constructivity and completeness of the general solutions in elastodynamics . . . . . 209—214

Zheng, Q.-S.: On the generalization of constitutive laws from their arotational forms . . . . . 97—105

Notes

Fetecău, C., Petrescu, S.: Heat transfer at spherical thin film solidification . . . . . 107—111

Kolář, V.: On the invariant turbulence measures . . . . . 113—117
